# dock:

## Hype the locals

Dock has its origin in an artists' initiative. With its activities dock promotes the discussion and appreciation of art local to Basel and the region.

## Information and Interface

Currently, dock contains documentation on 250 artists working in and around Basel. This provides a complete overview of the professional artists working here today and an in-depth take on the numerous activities of the art scene. Archival boxes, the website, and, especially, a contact person on location provide the tools for communicating these. With these, dock plays a pivotal role in circulating information and provides a location well frequented by artists and public alike. As such, dock is the interface between artists, curators, and art critics, and offers an invitation to the general public.

## Exchange and Network

Dock is physically present at the real-world location Klybeckstrasse 29 in Basel. Here, artists and public alike can access the different containers of information and avail of the many services. In addition, dock seeks to initiate lively exchanges between experts and provide insights into different aspects pertaining to the art practice, while also ensuring the direct contact to the artists.

## Communication and Mediation

Basically, dock is open to all professional artists and arts projects in and around Basel. Dock actively communicates and disseminates the information pertaining to the events and the artist profiles, positions, and dossiers.

## Services

Aimed at artists and arts projects, the professional and general public:  
**Archival Boxes** containing up-to-date documentation and catalogues  
**Eye-Catcher** providing a quick overview through select information  
**www.dock-basel.ch**, an on-line listing of artists and information  
**Workstation** for reading, browsing and researching  
**Contact Person** on location with help and information  
**Tours** for groups, companies, and schools  
**Meeting Point** speaking corner, bar, openings
